About this SEO Factor:

The meta description is an important on-page element, so pay particular attention to it. Not only do search engines consider it to understand what your page is about, but they also display your meta description in search results.

Hence, make your meta description both **keyword-rich** and **appealing to human searchers**. For higher rankings, place important keywords towards the beginning of the meta description.

Note: Meta descriptions that are not in line with the page's content (or are overly long/short) **may be ignored by search engines**, and the latter may pick a random text snippet to show in search results instead of your description.

✔ Meta keywords | 0.0% TF-IDF score

Well done! The meta keywords tag is not present on the page or is empty.

seo paketi	0.0%	0.00 0	-	-	No

wordpress slide tasarımı	0.0%	0.00 0	-	-	No
wp-rocket lisansı	0.0%	0.00 0	-	-	No

About this SEO Factor:

The meta keywords tag used to play a big role at the dawn of the Internet, but is **largely ignored by search engines** today. Besides, if it has your keywords, you run a risk of handing your keyword strategy over to the competitors.

However, if you still choose to use the meta keywords tag (e.g., if you target search engines like Baidu that are believed to still rely on meta keywords), make sure it's relevant to the page's content and contains a moderate number of keywords. Also, use comma (,) to separate keywords within the tag.

Body | 16.8% TF-IDF score

Some of your target keywords are missing from the page's body.

If search engines can't find target keywords in the body of your page, they may consider it irrelevant for those keywords and rank it lower in search results.

Keywords currently missing from your <body> text:

- decupe hizmeti
- wordpress slide tasarımı
- wp-rocket lisansı

How to fix:

Use approximately **504** word(s) in your page's body and place your keyword(s) as follows:

- **"seo paketi"** should be repeated **4** time(s)
- **"decupe hizmeti"** should be repeated **1** time(s)
- **"wordpress slide tasarımı"** should be repeated **1** time(s)
- **"wp-rocket lisansı"** should be repeated **1** time(s)

Keyword	TF-IDF score	TF-IDF (You)	TF-IDF (Avg)	TF-IDF (Min/Max)	Keyword Stuffing

wordpress slide tasarımı	0.0%	0.00 0	-	-	No
wp-rocket lisansı	0.0%	0.00 0	-	-	No

About this SEO Factor:

If your target keywords are present in the webpage's body, the page stands a better chance of high rankings. For greater impact, place keywords towards the beginning of your page.

You can use keywords without any additional tags on the page, or **put your target search terms in tags** like *H1*, *H2-H6*, *Bold*, *Italic* or *Link anchor*. Such tags are also part of your page's body and should be attended to during its optimization.

Also try to make the page's content not only **keyword-rich**, but also **appealing to human visitors**: maintain a logical structure, use headings and bullet points, add visuals and other multi-media content.

Be sure to refrain from black-hat page optimization practices (such as keyword stuffing, making your text the same color as the background, etc.), while

these could incur a search engine penalty.

ALT text | 0.0% TF-IDF score

None of your keywords are present in the page's image alt text.

If you use images on the page, it is better to create **keyword-rich alt attributes** for them, as this helps increase webpage rankings.

For more precise fine-tuning, see how your top competitors use keywords in their alt texts. However, you don't need to strive to copy competitor averages in regards to image alt text as they could vary from competitor to competitor.

About this SEO Factor:

While search engines can't read text off images, alt attributes (also known as "alternative attributes") help the former understand what your images portray. Therefore, they should **describe the image** and, if relevant, **include target keywords**.

Besides, with optimized alt texts you could get higher rankings in and more traffic from Google's image search.

H1 | 0.0% TF-IDF score

None of your target keywords are present in the page's H1 tag.

If search engines don't see your keywords in the pages H1 text (one of the most important page elements), they may rank the page lower for these search terms than they would otherwise.

How to fix:

Please, make sure your target keyword(s) are present in the page's H1 text.

Keyword	TF-IDF score	TF-IDF (You)	TF-IDF (Avg)	TF-IDF (Min/Max)	Keyword Stuffing
seo paketi	0.0%	0.00 0	1.15 1	1.06 - 1.33 1 - 1	No

wordpress slide tasarımı	0.0%	0.00 0	-	-	No
wp-rocket lisansı	0.0%	0.00 0	-	-	No

About this SEO Factor:

The H1 tag serves to mark the heading on a page. The best practice is to use **just one H1 tag per page**, while all subheadings should be marked up using less important heading tags: H2 to H6 tags subsequently.

To achieve higher rankings, place your keyword(s) towards the beginning of your heading.

If you're optimizing your page for **multiple keywords**, it's best to define your top-important keyword and use it in your H1 tag.

✔ H2-H6 | 17.9% TF-IDF score

Great job! Your target keyword(s) are found in the page's H2-H6 tags.

Keyword	TF-IDF score	TF-IDF (You)	TF-IDF (Avg)	TF-IDF (Min/Max)	Keyword Stuffing
seo paketi	71.6%	0.58 2	0.81 3	0.35 - 1.07 1 - 5	No

wordpress slide tasarımı	0.0%	0.00 0	-	-	No
wp-rocket lisansı	0.0%	0.00 0	-	-	No

About this SEO Factor:

H2-H6 tags serve to mark subheadings on a page (unlike the H1 tag that's used to mark the main heading). It is important to **observe the hierarchy of H2-H6 tags** on a page to avoid confusing search engines with your coding. For example, it's illogical use the H3 tag ahead of the H2 one, and so on.

At the same time, the use of keywords in H2-H6 tags is optional and would only give your page a slight ranking boost for such keywords.

Bold | 0.0% TF-IDF score

None of your target keywords are present in the page's bold text.

Before optimizing the element, see how your competition uses your keywords in their bold text. However, there is no need to strive to copy your competitor averages, because keyword usage in such tags is optional and may vary from competitor to competitor.

Keyword	TF-IDF score	TF-IDF (You)	TF-IDF (Avg)	TF-IDF (Min/Max)	Keyword Stuffing

About this SEO Factor:

Bold text is used on a page to give certain words additional emphasis (e.g., if you write `<b>bananas</b>` or `<strong>bananas</strong>` in the code - the visitors will see **bananas**). Search engines usually consider words in bold text **slightly more important** than words with no additional mark-up.

Hence, wherever natural, try to use your important keywords in bold text, but don't overdo to avoid over-optimization.

About this SEO Factor:

Link anchor texts are visible parts of links present on your page. Although the use of keywords in anchor texts **helps strengthen your page's semantic whole**, search engines are more likely to attribute the meaning of a link's anchor text to the page the link is pointing to.

Hence, you could also check the internal links pointing to your current page and make sure their anchor texts are in line with your page's semantics.
